

## Acknowledgment of the Reviewers for 2017

Peer-review process is an important step in publication of high quality research contributing to different fields of science. Scientific progress depends on the communication of information that can be trusted, and the peer review process is a vital part of that system. Thus peer-reviewers are part of a valued community. The editors express their appreciation to the following specialists for their contribution in providing peer review for the manuscripts submitted to the Bulletin of Emergency And Trauma during the period from December 2015 to September 2016.
